Program Description

Advancements in technology and globalization of the marketplace make the fashion industry an ever-changing, exciting place to work. This trillion-dollar industry needs bright, talented executives to guide the rapid pace of today's merchandising revolution. Skilled executives are required to deal with an increasingly complex variety of products and sourcing strategies and product development tasks, such as planning product lines months before they will appear in the stores. Once developed, new products must be sourced globally and then delivered to the consumer within a very short period.

The Fashion Merchandising and Management curriculum combines the fundamentals of business, including accounting, economics, marketing, finance and management, with textile and fashion courses taught by industry savvy professionals. Students learn the process of product development, Omni channel engagement, sourcing and supply chain strategy from fiber development to final product, and become familiar with the use of technology application as well as analytics. Additional topics in product lifecycle management, design concepts and merchandising are explored. Students are also involved in the process of selection, procurement and distribution of products in a retail setting where they learn the significance of product execution through visual presentation.

Learning Goals/Outcomes

In addition to the goals and outcomes outlined by the School of Business Administration, graduates from the fashion merchandising and management program will be able to:

- Identify the interrelationship between the supply and value chain
- Explain retail strategies and company structure in global environments

Curriculum: 4 years, 122-123 credits

Course	Title	Credits
First Year
