Program Description

The Executive MS. in Crisis & Emergency Management program offers an innovative approach to Crisis & Emergency Management (CEM) education. Students will enhance their skills through the lens of organizations dealing with complex systems thinking and practice and take a contextual shift from focusing on a disaster to integrating CEM into all organizational processes.

Our fully online and asynchronous program is designed for individuals who hold mid- to high-level positions in emergency management, who desire to build on their leadership skills, and who are seeking high-quality education that leverages their skills in organizational continuity and resilience.

Enabling students to continue working in their field, the accelerated curriculum features 8-week blocks of courses.

Curriculum: 30 credits
