Program Description

The MS in Health Professions Education is a 30-credit, fully online, interprofessional master's program designed to prepare leaders in health professions education, leveraging evidence-based approaches, educational best practices, and Jefferson's technology-rich environment.

The innovative curriculum includes courses in the traditional core areas for health professions education programs and novel courses covering Education Law, Diversity, Simulation and Inter-professional Education.

Learning Goals/Outcomes

- Incorporate understanding of pedagogical principles into health science teaching.
- Design and implement curricula in various formats including for classroom, clinical and virtual teaching.
- Effectively integrate technology into education.
- Demonstrate understanding of approaches to student assessment and program evaluation.
- Apply evidence-based principles to inform education and teaching practices.
- Become an effective leader in graduate health professional/medical education.
- Apply inter-professional and collaborative teaching models.
- Employ simulation education for health professions.
