Program Description

- Continuing & Professional Studies

The BS in Health Services Management prepares individuals for entry-level management positions in a wide variety of healthcare settings. Health services managers plan, organize, coordinate and supervise the delivery of healthcare services. They may be generalists who manage or help to manage entire facilities or systems, or specialists who manage clinical departments or services specific to the healthcare industry. You will learn to be familiar with and adapt to changes in healthcare policies, laws, regulations, and technology.
