EMS 410: Disaster Resp & Recov Planning

Disasters can be natural, technological, or terrorist in nature; and a proactive rather than re-active approach to disaster preparation is the best means of mitigating damage. This course covers systematic planning and recovery efforts for when disaster emergencies occur. Students will examine issues in their respective fields and develop strategies for response and recovery methods and techniques from related case studies.

Credits: 3

College: Jefferson College of Health Professions

Schedule Type: By Appointment - 3 students, Lecture

EMS 499: Applied Proj in Ems Leadership

Students will explore the relevant scholarly literature and then conduct an indepth analysis of the emergency services industry and design an innovative project. Knowledge of statistical analysis, process planning, and data gathering will be used to complete their analysis and report on a comtemporary topic or aspect of the business. Students will demonstrate their ability to assess the efficacy of program design as well as describe the project planning and implementation process. Student projects are evaluated based on the capacity to incorporate familiarity with systems and planning in a comprehensive project, in the context of their subject.
