## **PSYX 256: Psychology of Trauma**

This course provides an overview of psychological trauma. The history, etiology, theories, assessment, diagnosis, and treatment of traumatic stress at different ages across the lifespan will be explored. The course begins with discussion of a range of traumatic events and definitions of trauma symptoms and responses. Next, theoretical frameworks and models useful for understanding traumatic stress reactions are introduced, including developmental psychopathology, cognitive development, neuropsychology, and intergenerational systems theory. In addition, assessment, diagnosis, and the evidence for best intervention practices in treating traumatic stress are examined.
